

Stand No. 70, Health & Safety Show, Reebok Stadium, 8-9 October.

## DuPont exhibits new products at Health & Safety 08, Bolton

**At the Health & Safety Show 08/09 in Bolton on 8<sup>th</sup> & 9<sup>th</sup> October, the show's title sponsor, DuPont Personal Protection is displaying a range of exciting, new Tyvek®, Tychem® and Nomex® protective clothing solutions and will be giving presentations on protective clothing.**

New products in the Tyvek® range include Tyvek® Dual, a protective coverall that features a front and sleeves made entirely from TYVEK® fabric and a highly breathable back panel made of DuPont's finely engineered advanced composite technology fabric, Tyvek® Dual provides the wearer with extra comfort in addition to the protection of Tyvek® in most exposed areas. A new range of Tychem® accessories complements Tyvek® coveralls, giving extra protection where it is most needed.

The company will also be presenting Nomex® Metal Pro Plus, a heat-and-flame resistant fabric engineered by DuPont and selected weavers, knitters and garment manufacturers in the Nomex® Quality Partnership Programme. The fabric offers outstanding protection and resistance against molten metal splashes and sparks, significantly reducing the risk of burn injury and helping to prevent the potential for heat stress caused by physical exertion and the high environmental temperature of foundries and forges etc.

### **Seminar topics**

Alongside the exhibition, Ian Samson and Elaina Harvey, protective clothing specialists from DuPont Personal Protection, will be giving free presentations in the seminar theatre.

- Ian will talk about the correct method of selection and use of chemical protective clothing, cutting through technical jargon of specifications, and discussing best practice in the selection and use of chemical protective garments.
- Elaina will present the latest information on protection against burn injury from electric arc, including the imminent introduction of an IEC standard for garments, updated test methods

for types of arcs and the introduction of a revised European Standard to protect against heat and flame.

### **Added value**

Talking about the reasons behind DuPont's sponsorship of the show, Paul Clow, UK and Scandinavian Regional Manager for DuPont Personal Protection, said, "One of DuPont's core values is the safety of people, whether we are developing scientific ways to help people keep safe at work, or through our sustainable approach to business and the environment."

"The Health and Safety Show is one of several methods DuPont uses to take its global intelligence in product innovation and best practice in workplace safety to a local audience. For us, the show differentiates itself from other exhibitions by offering a more hands-on experience with the added value of industry specific seminar presentations."

"It provides an ideal platform on which we can network with other key industry players, share information with local businesses and it enables people to come and meet our team of protective clothing specialists and find out what we can offer in an unpressured environment. We are looking forward to presenting some very exciting product developments at the Show."

### **About DuPont**

DuPont is a science company. Founded in 1802, DuPont puts science to work by creating sustainable solutions essential to a better, safer, healthier life for people everywhere. Operating in more than 70 countries, DuPont offers a wide range of innovative products and services for markets including agriculture, nutrition, electronics, communications, safety and protection, home and construction, transportation and apparel.
