

IKAR GB launches the “DB-A2” Tripod.

IKAR GB are proud to announce that the UK launch of the IKAR DB-A2 Confined Space Tripod will be take place at Health + Safety 08 - North in Bolton on 8th and 9th October, stand 142.

The competitively priced DB-A2 is a best-seller in Europe and is now available in the UK. Distributed through IKAR GB, the DB-A2 (CE certified to EN795-B) is constructed from box section aluminium and offers excellent strength to weight comparisons. Weighing only 19kg, the DB-A2 accepts two workers or one worker and a 250kg load-winch. Offering rapid assembly, a stable base and large headroom IKAR GB are confident that the DB-A2 will become a permanent fixture in many industrial environments.

The DB-A2 accepts all IKAR “HRA” Devices once fitted with the appropriate bracket, the device’s cable then passes through a pulley connected to an eye-bolt supplied at the tripod head. The IKAR “ALKO 901” Load Winch can also be assembled onto the DB-A2 in a similar manner.

The DB-A2 Tripod can be supplied as a stand-alone piece of rescue equipment or as a complete package with the appropriate bracket, HRA device, pulley wheel and connectors. IKAR GB can also supply the required Confined Space Rescue Harness.

To complement the DB-A2, IKAR GB offers on-site consultations; comprehensive training courses; as well as servicing and re-certification of all IKAR Tripods and HRA Devices. In addition, IKAR GB offers for sale a complete range of Work at Height; Rescue from Height and Rescue from Confined Spaces products.
